

ST BERNARD LOCATION SERVICES

Product range

St Bernard Location Services are now the No.1 ethical choice for GPS based services to support vulnerable persons who wish to travel independently in the community.

At the core of this service is a highly secure UK based web service which can be configured to provide a tailored individual solution for each service user. Backing this service up, St Bernard are able to offer the most comprehensive range of devices available on the market today, which can be worn or carried by the user.

St Bernard are also able to cater for customers who do not want the full subscription service and who are happy to just link a locator device directly to their own smartphone.

If however the choice to subscribe to the web based service is made, this site can be accessed via any broadband link using PC, Laptop or tablet. For smartphone users a new App, (designed for both Android & iPhone) is also now available so that registered users can access the website and associated alerts whilst on the move. This feature is especially useful if attempting to locate a person whilst on the move.

All St Bernard alerts are extremely secure as the SIM cards carried by these devices are roaming DATA SIM's within a private network. This provides for a 99.999% reliability in the transmission of messages.

Professional Service Range

To address the demands of a professional service, where devices will be issued to multiple users over a period of time, we can offer a range of rugged devices and managed service offerings under our EASE brand. Devices within this range are:

EASE Companion GL300 is a small and very rugged passive device which is ideal for people to carry in their coat pocket or handbag. It comes with its own custom pouch which can allow the device to be attached to a set of keys or a trouser belt. The water resistant EASE Companion is a powerful GNSS locator designed for lone worker, and other vulnerable person tracking applications. The thumb sized button makes this device ideal for applications requiring rapid notification of emergency alert or regular setting of geo-fences based on current location. Its built-in GNSS receiver supports GPS and GLONASS and has superior sensitivity and fast time to first fix. Its built-in 3-axis accelerometer allows motion detection and extends battery life through sophisticated power management algorithms.

FEATURES SPECIFICATION

- Small and unobtrusive
- Excellent GPS sensitivity
- Water resistant
- A long battery life of up to 5-7 days in normal use
- Built in environmental temperature monitor
- Thumb sized button allowing easier emergency alert
- Internal 3-axis accelerometer for power conservation and motion detection

EASE Bracelet BRC1 is the worlds most advanced wrist worn GPS device. This device has been designed specifically to support Persons with Dementia who may forget to carry a device with them. The Bracelet can be worn on the wrist or further up a person's arm, as it is lightweight and un-obtrusive. In addition to GPS tracking capability, the EASE Bracelet also has a built in 3-axis accelerometer which allows for motion detection, and when linked to the St Bernard Service, can identify and report on activity levels of the user. Its quad band GPRS/GSM subsystem supports 850/900/1800/1900 MHz

FEATURES SPECIFICATION

- Lightweight & stylish
- Fully waterproof to 1m
- Long battery life 7 – 10 days in normal use
- Home Base station can provide property exit alerts
- Built in activity monitoring sensor signals user activity
- Unique & simple charging mechanism which is cable free
- Offered with either a secure fastened or a self-opening catch.

EASE Phone GT300 is a versatile device for higher functioning users such as younger people with learning disabilities, people with acquired brain injury or older people who are worried about falling or getting lost, and where simple mobile phone functionality may be useful. It's built in GPS receiver has superior sensitivity and fast time to first fix. Its quad band GPRS/GSM subsystem supports 850/900/1800/1900 MHz

FEATURES SPECIFICATION

- Long battery life of up to 3 days between charges
- Panic button which can trigger alerts and open a voice channel to a carer or monitoring centre
- Internal 3-axis accelerometer for power saving and motion detection including man down alert
- It is a simple to use mobile phone with 4 speed dial numbers.
- An auto "hands free" answer facility allows a carer or monitoring centre to talk to the user easily if there is an emergency.

EASE Watch WC1 has been designed to use in everyday life by persons who do not wish to carry an additional device in their pocket. The most commonly used function of this watch is to show time. The safety requirements are catered for by mobile phone capabilities for making help request calls, normal calls and receiving calls as well as the mobile data communications with the St Bernard Location Service.

The watch has an inbuilt GPS/GLONASS receiver enabling accurate location information of the wearer to be sent to the St Bernard Location Services when the wearer is outdoors. In the event that GPS/GLONASS location cannot be acquired mobile network cell location or home beacon location can be reported to the St Bernard services

FEATURES SPECIFICATION

- Full GPS location capability
- Lightweight & stylish with adjustable leather strap
- Panic button facility which can trigger alerts and open a voice channel to a carer or monitoring centre.
- 2-way voice call facility, allowing the user to make and receive calls
- Battery life, 8 – 12 hours in full tracking mode
- Easy to charge docking cradle

Consumer Range

For those applications where the need for an ongoing monitoring service is not a necessity and or the client or client's family are looking to purchase a device to monitor themselves, then we can now offer the St Bernard's "Watchful Eye" product range.

These also provide a cost effective solution where clients are not willing to take on a managed service agreement.

Watchful Eye

- Lightweight
- Colourful range of solutions
- Panic button option
- Alerts can be linked direct to a mobile phone
- Battery life up to 2 days
- Receive and make calls
- Supplied SIM free
